Data protection

At the International Federation of Surveyors (FIG) we take your privacy seriously, and want you to understand clearly how we will use the personal data you supply when registering to attend this FIG e-Working Week, which represents the establishment of a contract between you and FIG. We have one set of conditions for “ordinary” personal data (name, contact details, job title, etc) and a different approach to “sensitive” personal data (eg personal photograph; dietary requirements; disabilities). Where there is a legal requirement for FIG to share delegates’ personal data with government authorities in the host destination (eg for national security reasons), this will be clearly communicated to delegates.

By registering, you agree to share the “ordinary” personal data you provide with the other delegates who will attend the meeting, to enable effective networking and business exchanges to take place, including on the official virtual conference platform, Hopin.

By registering, you agree that FIG may process your data in their event registration system, and may communicate with you via email, post or other methods with important messages relating to this conference.

By registering you agree that FIG may add your personal data to their main CRM system, where they maintain records of the FIG-related activities of FIG members and others who have expressed an interest in FIG membership or FIG’s services and events. The general [FIG privacy policy](#) will then apply.

A listing of all registered delegates’ names, company and country, without any contact details, will be visible to all participants during the FIG e-Working Week in the password-protected virtual platform Hopin. This is for the purpose of encouraging participants to network at the event. The listing will be deleted immediately after the event takes place and the data will not be accessible to other parties.

Special opt-in conditions for sensitive personal data

Some personal data is regarded as particularly sensitive, and FIG will always handle this type of data with an appropriate level of care.

By agreeing to the general conditions when you register you also agree to let FIG use photo material in which you may be included this being in FIG news or promotional material, whether in print, electronic or other media, including social media and the FIG websites.

FIG 2021 Organizing Committee reserves the right to use any photograph/video taken at any event, without the expressed written permission of those included within the photograph/video.
